

Engineering Our Sustainable Future Driving Progress, Delivering Value

The Sustainable Energy and Environmental Protection Conference 2025

Bruce Price
bp Group Head of Engineering

Moving the world forward ...

Hornsea offshore
wind farm

Noor Abu Dhabi
solar complex

Tesla battery
storage

Lingen – green hydrogen (in planning)

UCC project in Papua Barat, Indonesia

In planning: CCS project to advance decarbonization efforts across Texas Gulf Coast

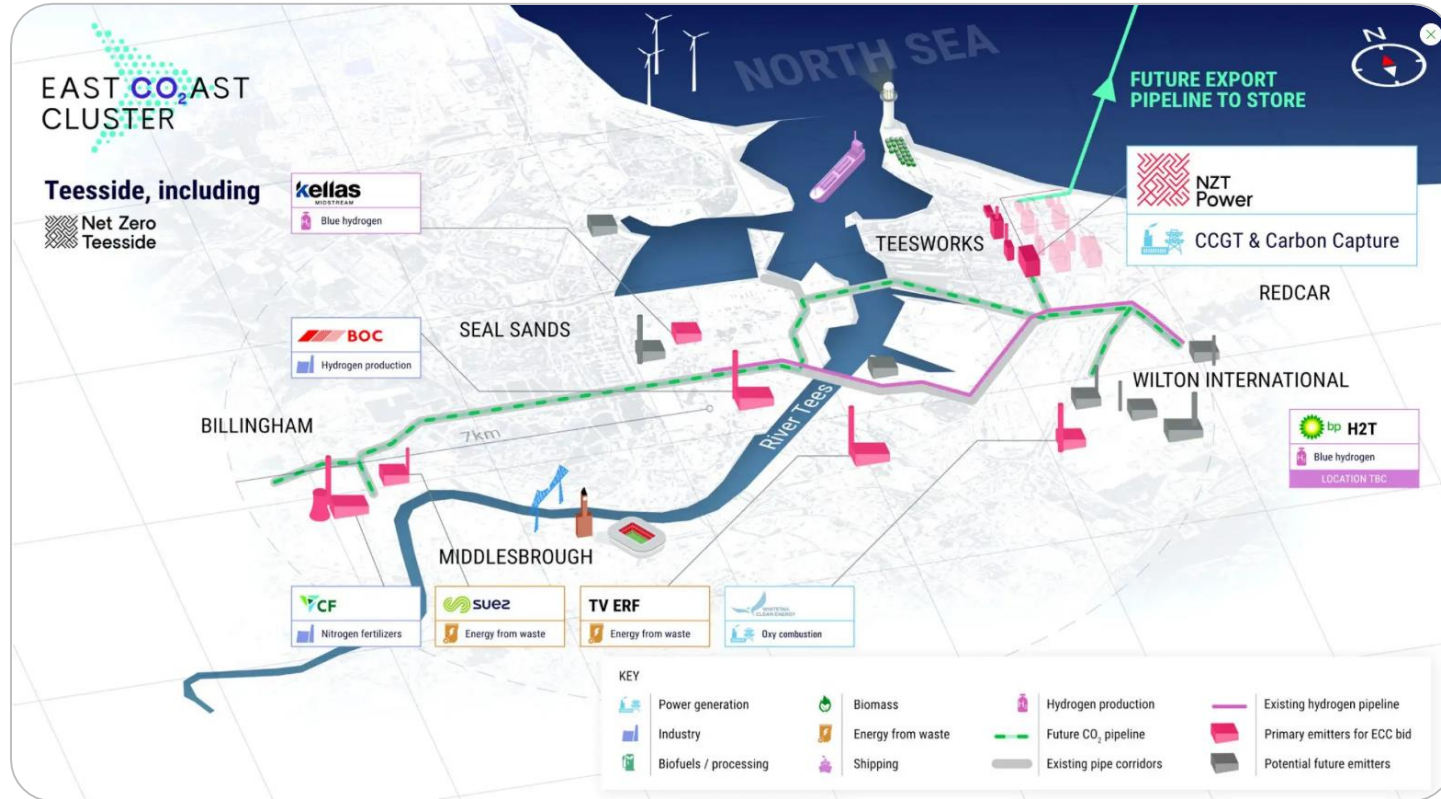

The fast pace of progress
and the challenge ahead...

Partnering to shape
the future

East CO₂AST Cluster – Northern Endurance Partnership (NEP) & NZT Power

Sustainability is
good business

Engineering a
sustainable future

Introducing our experts

1. **Andy Best** – Decarbonizing Upstream Oil and Gas: Tackling Greenhouse Gas Emissions at the Source
2. **Dr. Peter Evans & Sonna Sathiamoorthy** – How to reduce methane emissions through improved measurements
3. **Martin Towns** – Role of CCS in energy and industrial decarbonisation
4. **Dr. Faye Gerard** – Industry aids to reduce flaring
5. **Tom Wheeler** – Carbon as the 4th Fluid
